Memo

TO: President Booker and Board of Works Members
FROM: Doug Payne, Street Commissioner
RE: Multi-Conductor TV Inspection System Received January 12, 2016

On January 12, 2016, bids were opened for one new multi-conductor TV inspection system at the Board of Public Works meeting.

Bid Review:

Company	Make & Model	Bid
Brown Equipment Co., Inc.	Cues, Inc. Multi-Conductor TV Inspection System	\$299,000.00
Eco Infrastructure Solutions, Inc.	RS Technical Services Multi-Conductor TV Inspection System	\$258,847.00

After reviewing the bids, the RS Technical Multi-Conductor TV Inspection System that was bid by Eco Infrastructure Solutions, Inc. did not include the GraniteNet software or the lateral pan and tilt camera in their bid. These are two of the many exceptions that did not meet our specifications.

We request approval to accept the bid from Brown Equipment for the Cues, Inc. Multi-Conductor TV Inspection System that met 100% of our specifications. It includes the GraniteNet software that was recommended by Mike Mang, our IT consultant, and the lateral pan and tilt camera.

Your consideration is greatly appreciated.
